Technologies Used

TechOverflow

About the Project.

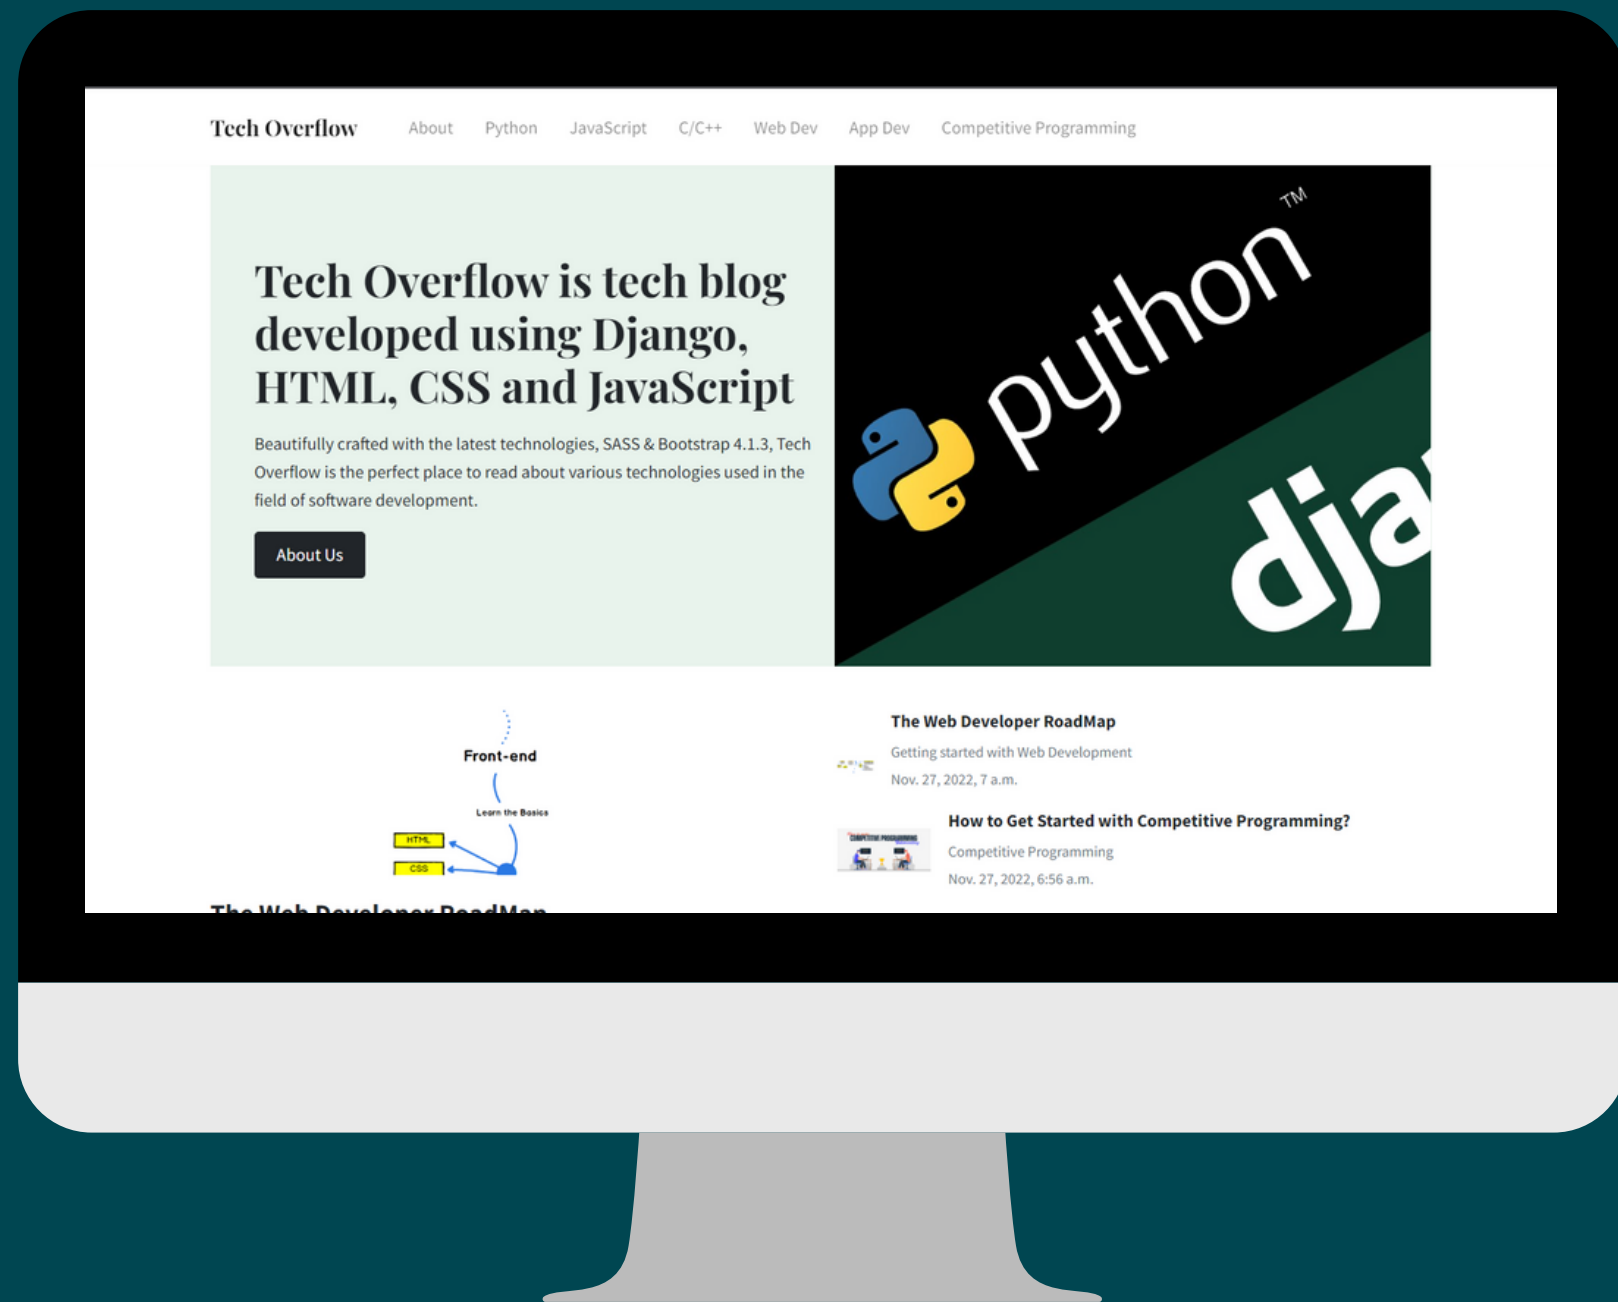

Tech Overflow is tech blog developed using Django, HTML, CSS and JavaScript.

Beautifully crafted with the latest technologies, SASS & Bootstrap 4.1.3, Tech Overflow is the perfect place to read about various technologies used in the field of software development.

Features

- Dynamically Rendered Blogs
- Admin Panel Access
- Superuser can post the blogs
- Category Wise Rendering
- Post facility to the admin user
- CRUD Access to the admin user
- Less load over server due to Whitenoise, which handles serving the static files
